Inhalt/Contents

An J, Eaton CW: Blocks with trivial intersection defect groups 461

Bak J-G, Lee S: Restriction of the Fourier transform to a quadratic surface in $\mathbb{R}^n$ 409
Baum H, Leitner F: The twistor equation in Lorentzian spin geometry 795
Bchatnia A, Daoulatli M: Scattering and exponential decay of the local energy for the solutions of semilinear and subcritical wave equation outside convex obstacle 619
Blunck S, Kunstmann PC: Weak type (p,p) estimates for Riesz transforms 137
Bogopolski O, Kudryavtseva E, Zieschang H: Simple curves on surfaces and an analog of a theorem of Magnus for surface groups 595

Cartwright DI, Woess W: Isotropic random walks in a building of type $\tilde{A}_d$ 101
Chachólski W, Libman A: Tower techniques for cosimplicial resolutions 385
Cleyton R, Swann A: Einstein metrics via intrinsic or parallel torsion 513

Daoulatli M → Bchatnia A 619
Dessai A, Wilking B: Torus actions on homotopy complex projective spaces 505
Diaconis P, Freedman D: The Markov moment problem and de Finetti's theorem: Part I 183
Diaconis P, Freedman D: The Markov moment problem and de Finetti's theorem: Part II 201
Dungey N: Heat kernel estimates and Riesz transforms on some Riemannian covering manifolds 765

Eaton CW → An J 461
Eelbode D, Sommen F: The inverse Radon transform and the fundamental solution of the hyperbolic Dirac equation 733
Erdmann K, Holloway M: Rank varieties and projectivity for a class of local algebras 441

Freedman D → Diaconis P 183, 201

Gaussier H, Merker J: Nonalgebraizable real analytic tubes in $\mathbb{C}^n$ 337
Guan P, Lin C-S, Wang G: Application of the method of moving planes to conformally invariant equations 1
Große Klönne E: De Rham cohomology of rigid spaces 223

Hartley MI, Leemans D: Quotients of a universal locally projective polytope of type $\{5, 3, 5\}$ 663
Heo J: Relative Dixmier property and complete boundedness of modular maps 89
Holloway M → Erdmann K 441

Ichino A: A regularized Siegel-Weil formula for unitary groups 241
Irgens MAS: Continuation of L^2-holomorphic functions 611

Jöricke B, Shcherbina N: On some class of sets with multi-sheeted envelope of holomorphy 711

Kato J, Ozawa T: Weighted Strichartz estimates for the wave equation in even space dimensions 747
Ken-Ichiro Arima: On index one covers of two-dimensional purely log terminal singularities in positive characteristic 423
Kishimoto T: On the compactifications of contractible affine threefolds and the Zariski Cancellation Problem 149
Krötz B, Otto M: A convexity property for the $SO(2, \mathbb{C})$-double coset decomposition of $SL(2, \mathbb{C})$ and applications to spherical functions 303
Kudryavtseva E → Bogopolski O 595
Kunstmann PC → Blunck S 137

Lahyane M: Rational surfaces having only a finite number of exceptional curves 213
Lee S → Bak J-G 409
Leemans D → Hartley MI 663
Leitner F → Baum H 795
Libman A → Chachólski W 385
Lin C-S → Guan P 1
Lin JP: H-spaces analogous to E_8 mod 3 675
Listing M: Scalar curvature rigidity of hyperbolic product manifolds 581

Merker J → Gaussier H 337
Miatello RJ, Podestá RA: Spin structures and spectra of $\mathbb{Z}_2^k$ -manifolds 319

Nazarov M: Rational representations of Yangians associated with skew Young diagrams 21

Otto M → Krötz B 303
Ozawa T → Kato J 747

Podestá RA → Miatello RJ 319
Polyakov PL: Global $\bar{\partial}_M$-homotopy with C^k estimates for a family of compact, regular q-pseudoconcave CR manifolds 813
Popescu CD: On the Rubin–Stark Conjecture for a special class of CM extensions of totally real number fields 529

Sabourau S: Systoles des surfaces plates singulières de genre deux 693
Seshadri H: On Einstein four-manifolds with S^1-actions 487
Shcherbina N → Jöricke B 711
Sikora A: Riesz transform, Gaussian bounds and the method of wave equation 643
Slapar M: On Stein neighborhood basis of real surfaces 863
Sommen F → Eelbode D 733
Swann A→ Cleyton R 513

Topping P: Winding behaviour of finite-time singularities of the harmonic map heat flow 279

Wang C: Biharmonic maps from R^4 into a Riemannian manifold 65
Wang G → Guan P 1
Wendt R: A character formula for representations of loop groups based on non-simply connected Lie groups 549
Wilking B → Dessai A 505
Woess W → Cartwright DI 101

Zieschang H → Bogopolski O 595
